**COMBO GRID TIED &  
SOLAR WATER HEATING**

**3.0kW SOLAR ELECTRIC**

**2.0KW SOLAR THERMAL**

Use evacuated tube technology  
to heat that hot water.  
More energy per M2 and less heatloss  
in cool weather

**2.5Kw ELECTRIC**

**3.0kW THERMAL**

SolarPeak are busy with both solar thermal and grid tied PV installs throughout New Zealand.

From Keri Keri in Northland to Invercargill, our systems are producing hot water and electricity.

More and more kiwis are aware of solar power generation as a smart investment. Imagine having your own power station on your roof.

Its easy, its affordable, and the savings are tax free. There is no solar tax...

Power companies keep putting prices up!

**It's payback time, install a SolarPeak today and see the difference in savings.**

## FAQ:

**Q:** What is the payback?

**A:** Our view is that "payback" is an excuse rather than a reason not to install solar.

When you own a solar system it is actually **your very own power generator**.

If you buy shares in a power company, what return to you get? do you pay tax on that income?

Every time power prices increase, your power generator saves you more money... **tax free !**

**Better than money in the bank !**
