

SolarPeak® NEWS

August 2015

This new 2kw SolaPeak power system is pitched north to perform at the optimum solar efficiency.

Our SolarPeak AP30 tube combined with a 300 litre stainless mains pressure cylinder is beyond doubt the most popular choice for new homes

PDF fastrack compliance docs supplied to architects by email for specs and planning.

This 20 tube SolarPeak replaced a damaged flatplate collector. A safety cage was installed against to prevent damage from trees and foot traffic

This new 2.5kw SolaPeak power system is flush mounted on a north facing steep roof for excellent solar performance

This 20 tube SolarPeak has replaced a frost failed flat plate collector and has increased the available hot water volume

Kiwi bank.

A \$2000* Kiwi bank grant is available for SOLARPEAK SOLAR ENERGY SYSTEMS.
